

AGED CARE IN YOUR HOME OR OURS?

YOUR HOME. OUR CARE.

At Carinity we value every person as a unique individual, and understand everyone's needs are different.

That's why at Carinity we take the time to really listen and understand you. We get to know you and your family, your needs and interests, and tailor your care and activities to you.

We want to ensure you're receiving the best care for your needs, meeting your quality of life and wellness goals. Sometimes that means delaying your welcome to one of Carinity's residential aged care homes.

Carinity also helps seniors across Queensland to remain living independently in their own homes. By supporting you in daily life, Carinity Home Care helps you to live a fulfilling life in the comfort of home and your local community.

Whether you require regular care services, short-term care or additional top-up care we will work with you to develop a tailored solution to your unique needs.

Carinity Home Care offers a full range of services from basic support and care to keep you healthy, happy and safe at home, to assisting with personal care, nursing care and supporting you after a stay in hospital.

Similar to residential aged care, you may be eligible for subsidised care through assistance programs from the Australian Government. An assessment will determine your eligibility for subsidies and outline your budget and any contribution you may need to make. Just like your individual care needs, we'll discuss all the available options to find the one that best suits you.

And at the right time, we'll be there to help you transition to one of Carinity's aged care homes. Whatever your needs, we encourage you to consider all care options.

Carinity is here to help, whichever way we can.

If you're considering home care, or would like to know more, call us on 1300 109 109 or visit CarinityHomeCare.org.au
